I am a software engineer with a background ranging from social work to biology research. Whether it is answering unknowns about cellular function, translating confusing documents into approachable language, or designing code, I'm driven by a desire to distill complicated problems down to their core issues and deliver value, clarity, & efficiency.

Technical Skills

Languages: JavaScript, Dart, Python, TypeScript, HTML, CSS

Frameworks: React, Flutter, Node.js, Express.js, NextJS

Databases: MongoDB, PostgreSQL

Other: Git, GitHub

Relevant Experience

Full-stack web development trainee General Assembly Seattle, WA
